Livingtree Engage

Welcome Families

New to Livingtree Engage? Livingtree Engage is a secure platform that connects you with your child's teacher, school and groups. It works on your smartphone and computer, and will bring you closer to your child's learning experiences at school.

Here is what you should know about Livingtree Engage:

It's easy to use: The platform was built similarly to today's top social media networks. Whether you are on your computer, tablet, or smartphone, you can easily navigate the platform to find out what your child is doing in school.

You can be engaged: With the ability to receive notifications and view posts from anywhere, you can find out what your child is learning every day. When teachers provide information, you can engage in your child's learning and provide valuable feedback to their teacher to enhance your child's education.

It's private, safe, and secure: The school and district have control of the platform. No one outside of the school community has access to the platform, and you must be invited in to gain access. Your information and your child's information is protected, and you control what information is shared from your account settings. Livingtree will never share or sell your information to anyone. Livingtree is a Student Privacy Pledge Signatory, and the platform is both FERPA and COPPA compliant.

Getting started is easy!

To join Livingtree at your school, you will receive a welcome invitation email and/or text message. To ensure you receive the welcome invitation, make sure your contact information at the school is correct and up-to-date.

Simply click and follow the instructions to activate your account. Once your account has been created, you can customize your notification settings and choose your language preference.
